About US.

About NileCode

NileCode is a Technology House with over **15 years** of experience in creating unique seamless digital experiences for users and clients.

With our vast team of Tech experts in all fields and an extensive background in Technology consulting, NileCode is a 360° holistic provider for real actionable tech solutions instead of temporary fixes and short lived prototypes.

Inspired by the river Nile, we create rich and flowing experiences and nourish the needs of our businesses partners through innovation, agility and adaptability.

The Nilecode team is agile, creative and focused on addressing the ever-present business challenges facing our clients.

We take pride on our ability to see beyond good looking products and think of the business applications to our tech solutions and offerings.

It doesn't begin with UI/UX and it doesn't end at some lines of code. We build tech-enabled business-focused best-in-market solutions for every day challenges in the most secure environments.

We are, and remain privacy-first and security-first.

Culture.

The NileCode Culture In Depth

Mission Statement

NileCode offers a business-first approach to cutting-edge feasible and attractive technology solution. We strive to offer companies from all industries and all sizes with real seamless and innovative technology products for dependable and actionably-sound ROI.

Values/Seamless Experiences

We are lead-takers and believe in offering each client a seamless working experience. NileCode clients are presented with pre-defined milestones set for real business success.

Building on Trust

We are trusted by enterprises across the world for our commitment to innovation and tireless 24/7 support.

We do it all, We do it well

Because we are a technology company, NileCode always updates its roaster of services and innovations to offer the latest in the tech world to each and every client. We don't take shortcuts and we don't use pre-packaged one solution-fits-all methods.

Corporate Philosophy

We believe in Three Main Foundations within our Company.

Innovation

NileCode is built with innovation at its core. We offer the unique mixture of unexpected and business-safe.

A Support Oriented Business

We support each other and our clients, every challenge offers room to learn and to grow.

We are Agile

In every sense of the word, we are agile and forward-thinking and think growth at every stage.

Services

We are hardcore tech geeks but at NileCode, we love looking at technology services from a business-first perspective.

We help guide our clients on the optimum tech solution to solve their particular business problem.

NileCode offers ground-breaking tech solutions that allow businesses to grow.

We are here thinking with every client on how their company is going to be in 10 years not the next week. NileCode is a catalyst for fast-tracking growth.

Leadership.

Why NileCode

Why NileCode The Mantra?

🔆 Take initiative	⛰ Be Passionate	</> Deliver Growth
</> Have Fun	🔆 Value Teamwork	⛰ Be Agile

We operate on a business-first model

We are innovative and agile

We prefer taking initiative

We believe in growing companies

We like fun-filled innovative business partnerships

We enjoy onboarding long-term partners not short-term customers

We have the know-how to deliver real growth

We are built with passion and operate in passion

Lastly, because, much like the river Nile, we are always flowing with creativity

More than 1000 **happy** clients asked for extra **ordinary work!**

Our Clients

Our Process.

Our Process

DISCOVERY

Tell us your plans, your goals, your deadlines, and your budget; we want to know it all. In this step, we explore our compatibility by listening quietly as we get to know you and your work.

DESIGN

We believe design and development should be seamless not mutually exclusive. Otherwise you'll have a functional product that is terrible to look at, or a beautiful product that has terrible functionality.

DEVELOPMENT

Form does follow function, which is why our software engineers are heavily involved in the project long. Both our design and development process follow the Agile model.

DEPLOY

The reason for hiring us is, after all, to help you launch a successful product. Not only we are professional designers and expert developers, we also have a penchant for deploying awesome applications.

SUPPORT

We are constantly improving standards, ramping up our employee base, knowledge and skills to provide harmonized teams that can manage and support your big projects.
